

Mailboxes

Mailbox considerations and requirements:

1. Shall be per the USPS guidelines shown below.
 2. Shall be per the Princeville approved mailbox, post and color list (see attached).
 3. Similar mailboxes and colors may be approved.
 4. All mailbox posts shall be a breakaway* design achieved via one of the following:
 1. Cedar or lpe fastened with an approved *Simpson Saddle EPB44PHDG 4x4* anchored in concrete with saddle plates installed parallel to the street.
 2. Cedar or ipe post planted in the ground at a maximum depth of 12-16".
 3. A plastic post attached at ground level to a metal ground pin.
- *Post installation is considered breakaway if the post pushes over if struck by a vehicle with only minor damage to the vehicle.
5. A concrete anchor for the mailbox post may only be used if post is attached via a *Simpson Saddle Fastener* that allows the post to fold over/breakaway when struck by a vehicle.
 6. Mailbox posts shall be a durable, decay resistant wood (such as cedar or ipe), aluminum or plastic post, with the option for a singular non-ornamental arm support.
 7. Reflective street numbers shall be placed on the box for night visibility.
 8. All posts shall be white or have a reflector placed on the box or post facing each direction of the street.
 9. The addition of tubes or other containers for delivery of newspapers is prohibited.
 10. Galvanized steel boxes and posts are approved.
 11. Beige, black, brown, green, gray or white are approved mailbox colors.
 12. Owners may custom paint their mailboxes as long as colors are not intrusive or excessively bright.
